PROFESSIONAL SUMMARY

AI-focused Software Developer passionate about building production-ready web applications, AI-powered products, and interactive digital experiences. Experienced through real-world internships and live projects involving Artificial Intelligence, modern web development, Firebase cloud technologies, multiplayer systems, and productivity applications. Strong interest in Generative AI, software engineering, and product development with a builder's mindset.

PROFESSIONAL EXPERIENCE

AI & Cyber Security Intern | Indian Servers Pvt. Ltd.

May 2026 – Jun 2026

- Completed an intensive internship covering Artificial Intelligence, Machine Learning, cybersecurity, and automation.
- Delivered structured, project-based assignments covering real-world AI applications.
- Built working knowledge of AI workflows, ML fundamentals, and secure development practices through hands-on exercises.

Software Development Intern | Devit

May 2026 – Jun 2026

- Contributed to production-grade software projects within Agile development teams.
- Built features for HippocampusOS, Devit's internal Learning Management System, across frontend and backend modules.
- Participated in sprint planning, stand-ups, and code review while translating live client requirements into working software.

PROJECTS

Volt Sensei — AI-Powered JEE Learning PlaVorm

- Engineered and deployed an AI-powered JEE learning platform with dynamic quizzes, XP gamification, and real-time feedback.
- Architected AI-generated quiz systems and immersive 3D models for Physics and Chemistry visualization.
- Implemented Firebase Authentication and Firestore for secure, real-time user data sync.

Pokemon Draft Arena — Real-Time Multiplayer Drak Battle Game

- Engineered a multiplayer drafting game featuring private-room matchmaking and synchronized game-state management.
- Designed a strategic multi-round drafting system with hidden selections, team building, and battle preparation.
- Built Firebase-powered room management, match persistence, and a custom battle simulation engine.

ResumeForge — AI-Powered Resume Builder & Analyzer

- Engineered a resume platform supporting live building, editing, analysis, and export workflows.
- Developed Resume Health Report and Resume Doctor systems delivering actionable improvement recommendations.
- Implemented local PDF/DOCX/TXT parsing with privacy-focused processing and a professional export pipeline.

Fit Minds — AI-Powered Fitness & Wellness PlaVorm

- Engineered and deployed a production-ready AI-powered fitness platform featuring personalized workout planning, nutrition guidance, BMI analysis, activity tracking, and a Health AI assistant.
- Developed personalized workout scheduling, Exercise Rankings, AI-powered Diet Planner, smart Diet Reports, integrated pedometer tracking, and persistent Health AI conversations using a modern React and Firebase architecture.
- Implemented Firebase Authentication, Cloud Firestore, Firebase Hosting, Google Gemini AI integration, responsive mobile-first design, and production-ready UI/UX across the complete application.

Volt Interview — AI-Powered Mock Interview & Career Preparation PlaVorm

- Built an interactive mock interview platform simulating realistic HR, Technical, and Project interviews through AI-powered conversational workflows.
- Designed multiple interviewer personas with structured evaluation, personalized feedback, and interview analytics to track user progress.
- Implemented Firebase Authentication, Firestore-based interview history, and gamification features on a scalable architecture.

TECHNICAL SKILLS

AI & Prompt Engineering: Generative AI, Prompt Engineering, AI Workflow Design, LLM Applications

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS

Backend & Cloud: Firebase Authentication, Cloud Firestore, Firebase Hosting, REST APIs

Developer Tools: Git, GitHub, VS Code, Vite

Software Engineering: Agile Development, Version Control, Deployment, UI/UX Design, Product Design

EDUCATION

Bachelor of Technology — CSE (Data Science)
G. Pulla Reddy Engineering College, Andhra Pradesh | 2023–2027 (Expected) | CGPA: 8.1/10

CERTIFICATIONS

- Prompt Engineering for Developers — Infosys Springboard
- Generative AI Fundamentals — Infosys Springboard
- Cloud Computing Essentials — Infosys Springboard
- GitHub & Version Control — Infosys Springboard
- AI First Software Engineering — Infosys Springboard
- Data Science — Infosys Springboard
- Artificial Intelligence & Cyber Security Internship — Indian Servers Pvt. Ltd.
- Real-Time Software Development Internship — Devit

PORTFOLIO HIGHLIGHTS

- Built and deployed multiple production-ready web applications using React and Firebase.
- Completed professional internships in Artificial Intelligence, Cyber Security, and Software Development.
- Experience with Agile workflows, production software engineering, and cloud deployment.
- Strong interest in Generative AI, Game Development, and Product Engineering.
